TATTOO REMOVAL

We have both technologies needed for the removal of plain black and multi-coloured tattoos. The mechanical Q-Switched hand piece works by vibrating and breaking down the ink particles in the tattoo. As the area heals, the body's immune system flushes away the shattered ink particles, causing the tattoo to be removed.

Treatment rates are usually charged between R70-R100 per square cm of tattoo coverage - depending on the colour of tattoo

Botulinum Toxin

Botulinum toxin injections are noted primarily for the ability to reduce the appearance of facial wrinkles. They're also used to treat conditions such as neck spasms (cervical dystonia), excessive sweating (hyperhidrosis) and can also prevent chronic migraines.

Fillers

Dermal fillers, also known as soft tissue fillers, lip and facial fillers, or wrinkle fillers are approved by the FDA for use in helping to create a smoother and/or fuller appearance (restore volume) in the face, including nasolabial folds, cheeks, chin, lips, and back of the hands.

TESSLIFT™ Threads

TESSLIFT is the World's first CE marked mesh scaffold technology formulated by TESS (Tissue Elevation Suspension System). Tesslift is the new generation of lifting devices that has overcome the limitations of previous generations with a unique manufacturing technique. This innovation comes from the mesh. Specially designed mesh induces significant tissue growth of the surrounding tissues through its pores, increasing the volumetric tensile strength to enable the most effective, safe and long-lasting effect. It's excellent for lifting the face, neck, eyebrows and shaping noses.

Biostimulators

Are you bothered by lines and wrinkles and loss of facial volume due to aging or genetics? If so, biostimulators may be a great treatment option. Unlike other treatments that simply restore lost volume with hyaluronic acid, biostimulators actually trigger your body's natural production of collagen, helping the skin produce it's own volume for natural-looking and prolonged results.

PLASTIC SURGERY

As a doctor-owned and directed medical skincare and aesthetic clinic, S & S Aesthetics is guided by the medical expertise of Dr. Siddharth Gautam (Dr. Sid), a board-certified plastic, reconstructive and aesthetic surgeon, with a special interest in facial plastic surgery, breast reconstruction, microsurgery, and body contouring.

Book a consultation with Dr. Sid today to provide you with professional support on your aesthetic journey today.
