DYE VL PRO LASER TREATMENT

The Alma Dye VL Laser is an advanced vascular and pigmentation treatment technology that utilizes narrow-band light energy to target and reduce the appearance of vascular lesions, rosacea, spider veins, and pigmented skin concerns such as sunspots and freckles. As part of the Alma Harmony XL Pro platform, it offers a safe, non-invasive solution with minimal downtime, making it ideal for patients seeking effective skin rejuvenation and tone correction. Its precision and versatility ensure consistent, natural-looking results across various skin types.

TATTOO REMOVAL

We have both technologies needed for the removal of plain black and multi-coloured tattoos. The mechanical Q-Switched hand piece works by vibrating and breaking down the ink particles in the tattoo. As the area heals, the body's immune system flushes away the shattered ink particles, causing the tattoo to be removed.

Treatment rates are usually charged between R70-R100 per square cm of tattoo coverage - depending on the colour of tattoo

*Consultation Required Prior To Treatments

✔ Skin Tone & Texture

AWARD-WINNING TECHNOLOGY

At S & S Aesthetics, we combine Alma Hybrid's cutting-edge technology with expert care to ensure you receive safe, effective treatments in a comfortable environment, yielding incredible results from this award-winning laser skincare.

HAIR RESTORATION TREATMENT

Harness the power of cutting-edge technology with Alma Hybrid's Trans Epidermal Delivery (TED) handle, exclusively at S & S Aesthetics in Africa, featuring Ultrasound-assisted infusion for deeper penetration coupled with our Advanced Hair Complex+ Growth Factor Serum. This non-invasive, pain-free treatment stimulates natural hair growth, improving scalp health and revitalizing hair follicles for thicker, stronger hair.

Treatments starts with a consultation with our medical practitioners, who will then determine the concern with the patient and then advise on a treatment plan. Treatments are split into 5 sessions, and may require more sessions based on initial results.
